

The Honeywell Excel 10™ Digital Wall Module lets you reduce inventory and increase your business options, all with a single model. Easily installed and intuitive to operate, the Digital Wall Module also reduces troubleshooting costs and customer callbacks to help improve your bottom line.

Excel 10™ Digital Wall Module

For the wide variety of applications now specifying user-friendly LCD displays, the Honeywell Digital Wall Module installs easily and is intuitive for end users to operate. Designed for use with the Excel 10™ family of controllers, this single model minimizes inventory costs and provides immediate business opportunities. A second model with a low-cost humidity sensor is available for applications requiring humidification/dehumidification.

INTUITIVE, PLUG-N-PLAY DESIGN

- State-of-the-art design allows simple, hassle-free wiring and minimizes troubleshooting.
- Easy-to-use module minimizes customer callbacks.
- LCD display shows occupancy mode, setpoint, fan speed, temperature and humidity or fan speed.
- Out-of-the-box configuration satisfies the vast majority of applications. If needed, the user can quickly customize temperature setpoint, fan operation and engineering units.

DIGITAL WALL MODULE HIGHLIGHTS

- Out-of-the-box solutions reduce installation and troubleshooting costs.
- One model for many applications reduces handling and stocking costs.
- Intuitive easy operation reduces costly customer callbacks.
- T7560A used with Excel 10 is the lowest-cost LCD display solution available.

CONTROLLER HARDWARE

- Setpoint wheel for setpoint adjustment.
- Integral 20k ohm NTC temperature sensor.
- Integral humidity sensor (T7560B only).
- Terminal block with eight terminals for minimal power consumption with 24 Vac/dc input.
- Tamper-resistant locking cover.
- Separate mounting base included for easy installation.
