

## Commercial/Industrial Combustion Product Overview

---

### Fluid Power Gas Valve and Actuators

Provides high level of safety and application flexibility

- Valves are used to control the flow of gas to commercial/ industrial burners
- Rated as safety shutoff valves
- Number of valves required depends on codes and standards
- High Close off pressure
- On-Off, Lo-Hi-Lo and Modulating models available
- Various voltages available
- Integrated, bolt together design
- C6097 Gas/Air Pressure switches can be flanged directly to valves
