EP2 SERIES

NOTICE

- This product is not intended for life or safety applications.
- Do not install this product in hazardous or classified locations.
- Read and understand the instructions before installing this product.
- Turn off all power supplying equipment before working on it.
- The installer is responsible for conformance to all applicable codes.

EP2 SERIES

Electropneumatic Transducer

Installer's Specifications

Control Input 4-20mA, 0-10V, 0-5V; jumper selectable Input Impedance 4-20mA, 250ohm; 0-5/0-10V, 10k ohm Manual Override Jumper selectable mode, digital pushbutton adjust Alarm Contact 100mA@30VAC/DC (If equiped) Accuracy 1% F.S.; combined linearity, hysteresis, repeatability Compensated Temp. Range 25° to 140°F (-4°C to 60°C) Temp Coefficient ±0.05%/°C Operating Environment 10-90% RH, non-condensing -4°C-60°C SCIM 523 in3/min.@45 psi; 8520 cm3/min@310.3 KPA; 333 in3/min@20 psi; 5407 Control Range 0-20psig or 3-15psig jumper selectable Pressure Differential 0.1psig (supply to branch) Pressure Indication Electronic, 3-1/2 digit LCD Minimum Tubing Length 15-feet Port Connection 1/8" id poly tubing Media Connection Clean dry air or inert gas. Not for use with oxygen service	Power Supply	22-30VDC, 20-30VAC, 47-63 Hz., 150mA max.

QUICK INSTALL

CAUTION: Use electrostatic discharge precautions (e.g., use of wrist strips) during installation and wiring to prevent equipment damage.

- 1. Mount transducer using screws provided. Take care to avoid damaging electronic components. Location of mounting holes is shown in dimensional drawing.
- 2. Wire transducer as shown in wiring diagram on following page.
- 3. Configure jumpers for desired operation as shown on following page.
- 4. Attach pressure tubing to hose barbs. Observe MAIN and BRANCH port labels. Use flexible ¼" O.D. poly tubing for main and branch pneumatic connections. *Main* supply pressure must not exceed 45 psig.

DIMENSIONS

WIRING & CONFIGURATION

JUMPER CONFIGURATION:

INPUT: Select CURRENT (4-20mA) or VOLTAGE (0-5/10V)

VOLTAGE: For voltage mode of operation, select 0-5V or 0-10V.

SCALING: Select 0-20psi or 3-15psi scaling.

MODE: Select AUTO for normal operation, or MANUAL to adjust pressure

using pushbuttons.

OPTIONS:

Alarm Mode Relay: The alarm contacts will open if the unit cannot obtain 80% of commanded pressure within two (2) minutes.

Manual Mode Alarm: Contacts will open when manual mode is selected. (Auto mode contacts are closed).

Vent On Power Fail: The EP series will vent the branch line pressure on power failure. (For pressure hold on power failure, ordering table for part numbers).

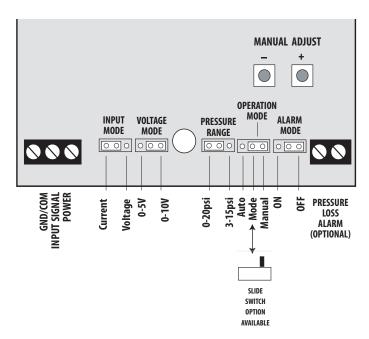

GND/COMMON: Power supply ground and signal common.

INPUT SIGNAL: 4-20mA, 0-10VDC, or 0-5VDC input from control system.

POWER: 22-30VDC, 20-30VAC. From control system or

external power supply™ or transformer.

NOTE: In 24VAC transformer applications, one side of transformer secondary is connected to signal common. Some control systems may require a dedicated power supply transformer or isolation transformer.

PRESSURE LOSS ALARM:

Normally closed, solid-state contacts open if main supply pressure fails, or transducer is otherwise unable to produce correct branch pressure. Connect to digital input of control system for alarm status indication. If commanded pressure is not within 80% inside a two (2) minute window Alarm contacts will open.

- 0-20 psi alarm contact will not change state when commanded pressure is four (4) psi or less
- 3-15 psi alarm contact will not change state when commanded pressure is (5.4) psi or less
