

pollen

dust

mold SPORES

pet DANDER

Clean. Unseen. Serene.

Imagine having dust, pollen, mold spores and certain bacteria filtered by a proven, dependable workhorse that's not only good for the environment, but is also quiet and out of sight.

With the Honeywell F300 Electronic Air Cleaner, you won't have to imagine. Just sit back and enjoy.

Built And Backed By Honeywell

Along with Honeywell's leading 5-year warranty, the F300 is backed by Honeywell's exclusive Clean Coil Guarantee.

Over time, the inner workings of your heating and cooling equipment can become coated with efficiency-robbing dust. Because the Honeywell F300 Electronic Air Cleaner captures particles before they can accumulate on critical parts in the duct system, the Clean Coil Guarantee is your assurance that system efficiency and optimum comfort will be maintained.

With it's Clean Coil Guarantee, Honeywell guarantees the homeowner that the cooling coil will stay clean or Honeywell will help pay for cleaning.

5-YEAR
WARRANTY

Honeywell

F300 Whole-House Electronic Air Cleaner

Honeywell

The Last Air Cleaner You'll Ever Need.

does air really need to be cleaned?

>>> According to the Environmental Protection Agency, indoor air can be up to two- to five-times more polluted than outdoor air. A typical one-inch furnace filter traps larger particles to protect your heating and cooling system, but doesn't trap many of the invisible particles.

The Honeywell F300 Electronic Air Cleaner features advanced three-stage filtration technology that efficiently traps the majority of airborne particles as they pass through the system.

The Honeywell F300 Electronic Air Cleaner not only works to clean the air but can also keep your heating and cooling equipment at peak efficiency.

Eco-Friendly

But there's more. The Honeywell F300 Electronic Air Cleaner features a renewable filter, so you won't need to replace your furnace filter each month (and send the dirty ones to landfills). You'll never find anything easier. Simply wash the Honeywell F300 Electronic Air Cleaner's renewable high performance filter cell once a year and you'll never need to buy another filter.

Plus, the Honeywell F300 Electronic Air Cleaner helps save you money by keeping your heating and cooling equipment clean and extending its service life. And because it is designed to maintain excellent airflow even under a heavy load, you can count on cleaner air continuing to circulate in your home.

Reliable And Renewable

Honeywell introduced electronic air-cleaning technology for the home, and the Honeywell F300 Electronic Air Cleaner continues to provide reliable air cleaning while benefiting the environment.

Simply Smart

To sum it all up, the Honeywell F300 Electronic Air Cleaner:

- Is the most effective renewable air cleaner available
- Saves you money through efficient operation
- Saves you money — you'll never have to buy replacement filters
- Saves you the time and hassle of seeking out replacement filters
- Is built and backed by the Honeywell name

This chart shows why the Honeywell F300 Electronic Air Cleaner is the last air cleaner you'll ever need

TYPE OF AIR CLEANER	CAPTURE RATE*	REPLACEMENT INTERVAL	COST PER YEAR
Honeywell F300 Electronic Air Cleaner	Up to 99%	No replacement needed; clean every 6 – 12 months	\$0
Whole-House Replaceable Filter System	Up to 85%	6 – 12 months	\$40 – 200
Standard 1" Filter	Up to 9%	1 – 3 months	\$24 – 60

*Capture rate against common airborne allergens from the air passing through the filter/system.

Whole-House Effectiveness

While portable air cleaners can provide a level of effectiveness in individual rooms, the Honeywell F300 Electronic Air Cleaner works with your heating and cooling system to clean the air going through your duct system. As air re-circulates, the Honeywell F300 Electronic Air Cleaner captures up to 99 percent of airborne dust, pollen, smoke, pet dander, mold spores and certain bacteria that pass through the system — dramatically better than a typical one-inch furnace filter. And unlike portable air cleaners, the Honeywell F300 Electronic Air Cleaner is installed out of sight to work quietly and invisibly.

Built-In Reliability

One of the reasons why the Honeywell F300 Electronic Air Cleaner is the only air cleaner you'll ever need is that it's built by Honeywell, the most trusted name in the business. Quality materials, efficient operation, long-term service — those are all hallmarks of the Honeywell name.
