

# 1/2" - 3" Control Ball Valves

COMPACT AND COST EFFECTIVE

- Unique low torque valve design allows for the use of more cost effective actuators than competition
- Sizes from 1/2" to 3" in FNPT and 4" to 6" in flanged models
- The widest range of Cv choices in the industry to simplify your selection process
- Field serviceable stem seal design makes these the only control ball valves that can be serviced in place rather than replaced
- Accurate flow control from the parabolic flow insert provides equal percentage control for optimum comfort
